The Lab-Grown Diamond Association Platform

Complete operating system for running a trade association — every member, application, invoice and event on one connected platform, replacing scattered spreadsheets, manual approvals and WhatsApp-driven follow-ups. Built for the lab-grown diamond industry, with member self-service on one side and full administrative control on the other.

Why Association Run on This Platform

- **Approval-first operations** — every membership application moves through a defined, signed-off workflow with status visibility at each stage, so nothing sits in someone's inbox.
- **Billing that runs itself** — payment gateway linked invoicing, so every payment auto-generates a compliant invoice without manual entry.
- **Accounting-synced, not double-entered** — invoices and payments flow straight into Tally / Zoho Books / QuickBooks, keeping association books current without re-keying.
- **One portal per audience** — members self-serve everything from application to renewal; admins run the entire operation with role-based access, no separate systems to reconcile.

What You Get

Portal 1: Member Portal (Public Website + Member Login)

1. Public Website	Association homepage and about, public member directory (if allow), upcoming events listing with public event pages, membership application form, login/signup.
2. Application & Approval	Online application submission, real-time status tracking through each approval stage, notification on status change.
3. Profile & KYC	Company details, KYC document upload, industry-specific fields (IEC code, GST, trade license), certification/accreditation status, profile update requests.
4. Billing & Payments	Invoice viewing, online payment for fees and renewals, receipt download, full payment history.
5. Renewals	Renewal initiation, expiry visibility, automated reminders ahead of due date.
6. Events	Event browsing, registration, online payment for paid events and registration.
7. Communication	Notices and circulars from the association, delivered in-portal and via email/WhatsApp.
8. Member Directory	Searchable directory of approved members for industry networking and B2B discovery.
9. Responsive Design	The Member Portal will be built mobile-responsive, ensuring full functionality across desktop, tablet and mobile browsers.

This is web responsiveness, not a native mobile app (see Out of Scope above)

Portal 2: Admin Portal (Role-Based Access Control)

1. Onboarding & Access Control	Role-based access setup (Super Admin, Admin, Committee/Approver, Accounts), permission mapping per role.
2. Member Management	Application review, approve/reject with remarks, category/tier management, suspend/reactivate, profile editing.
3. Approval Workflow	Configurable multi-stage approval flow, approver assignment, committee members restricted to their queue via RBAC.
4. Billing & Finance	Invoice generation and tracking, dues and overdue visibility, fee structure configuration, refunds, payment gateway reconciliation.
5. Accounting Integration	Two-way sync with cloud base accounting platforms such as Refrens, Vyapar, Zoho Books for every invoice and payment.
6. Events & Activity Management	Event creation, registration management, attendance tracking, attendee reporting.
7. Communication	Broadcast notices and circulars to all members or filtered by category, via email/WhatsApp.
8. Hierarchy & Designations	Office-bearer structure setup (President, Secretary, committee, chapter heads), role mapping.
9. Dashboard & Reports	Total members, pending approvals, revenue collected, renewals due, event statistics — exportable.

Out of Scope

- Mobile App — This proposal covers a web-based platform only (Member Portal + Admin Portal). Native iOS/Android apps are not part of this scope and can be quoted separately if required in the future.
- Marketing website/CMS beyond the association's core public pages (blogs, SEO campaigns, etc.)
- Custom hardware integration (e.g. physical event check-in devices, RFID/badge printers)
- Data migration from legacy systems beyond basic import (unless specified separately)
- Multi-language/regional language support (unless specified separately)
- Third-party subscription costs (payment gateway, WhatsApp API, accounting software, hosting — client-borne, as already noted in Terms)

Sarvadhi

An ISO 9001:2015 & ISO 27001:2022 Certified Company

Terms & Conditions

- **Refunds** — All payments are non-refundable.
- **Support Period** — 3 months of complimentary support included post go-live. Continued support beyond this period is available under a separate AMC, to be quoted at the time.
- **Scope** — Delivery is limited to the modules and features listed in this proposal (Member Portal + Admin Portal as scoped). Anything not listed is out of scope and quoted separately.
- **Client Responsibilities** — The client nominates a single point of contact, provides content/data (member categories, fee structure, branding assets, etc.) in an agreed format, and gives feedback or sign-off within five working days of each milestone. Delays in these inputs shift the delivery schedule accordingly.
- **Support** — Runs Monday to Saturday, 10:00–19:00 IST, over email and WhatsApp, with first response within eight working hours.
- **Third-Party Costs** — Payment gateway charges, WhatsApp Business API messaging charges, accounting software subscription (Tally/Zoho Books/QuickBooks), domain, SSL and hosting charges are borne by the client.
- **Change Requests** — Features or scope outside the package need written approval and are billed separately.
- **Updates** — Minor versions and security patches included during the support period; major new features may be chargeable.
- **Data Ownership** — All business/member data belongs to the client and resides on the client's own hosting/cloud account. Sarvadhi accesses it only as required for implementation and support.
- **Warranty** — Defects in delivered scope reported within the 3-month support window are corrected at no additional cost. The warranty does not cover issues arising from client-side infrastructure, third-party integrations or unauthorised modification.
- **Intellectual Property** — Source code remains with Sarvadhi; the client receives the deployed solution and agreed deliverables.

This proposal is valid for 7 days from the date of issue. To proceed, confirm in writing along with the advance payment, and we will share the kick-off schedule.
